

PRODUCT PORTFOLIO MAP

Genius restaurant technology

McDonald's capability overview

One connected restaurant technology portfolio
Genius brings enterprise commerce, kitchen operations, digital experience, drive-thru, self-service, purpose-built hardware, payments and back-office capabilities together within a flexible platform.

Prepared for	Jeff Coffland
As of	August 12, 2026
Company	Global Payments

Portfolio at a glance

- Genius POS, Kitchen, Digital Menu Board, Drive Thru, Kiosk, Hardware, Payments and Back Office.
- Each entry summarizes product heritage, capabilities, relevance to McDonald's and selected experience.
- CosMc's is presented first where it provides the most directly relevant experience.

Commerce and kitchen operations

Genius POS

Heritage	Xenial enterprise POS and Xenial Ordering, now part of the Genius Cloud portfolio.
Capabilities	Cloud enterprise POS with centralized management, real-time synchronization, device and operating-system flexibility, rapid terminal failover and offline operation for up to 30 days.
McDonald's relevance	A flexible restaurant-commerce and integration platform that can connect front-of-house channels with enterprise services.
Selected experience	CosMc's selected Genius Cloud POS as part of its integrated restaurant technology platform. Additional enterprise experience includes A&W Canada across 1,032 restaurants and 7 Brew across more than 530 locations.

Genius Kitchen

Heritage	Xenial Kitchen Management (XKM), Kitchen Management and Order Management System (OMS), now within the Genius portfolio.
Capabilities	Kitchen displays route items to configured production stations, support drive-thru and other destination-specific views, provide order-ready status and support configurable touchscreen or bump-bar workflows.
McDonald's relevance	Connects order channels with production workflows to support throughput, order accuracy and operational visibility.
Selected experience	Genius Kitchen is supported by active product documentation and a continuing Xenial Kitchen release history.

Digital menu boards and drive-thru

Genius Digital Menu Board

Heritage	SICOM DMB, first developed in 2009, was replaced by the next-generation Genius digital menu platform following Global Payments' acquisition of SICOM.
Capabilities	Centralized content management, scheduled dayparts, local and corporate control, indoor/outdoor menus and order-confirmation boards. System-on-chip displays can retain scheduled content during an internet outage.
McDonald's relevance	Offers a flexible digital-menu architecture for targeted indoor, drive-thru and order-confirmation requirements.
Selected experience	CosMc's selected Genius indoor and drive-thru digital menu boards as part of its integrated restaurant technology platform. Yoshinoya deployed digital menu boards at 106 locations.

Representative Genius system-on-chip digital menu board configuration

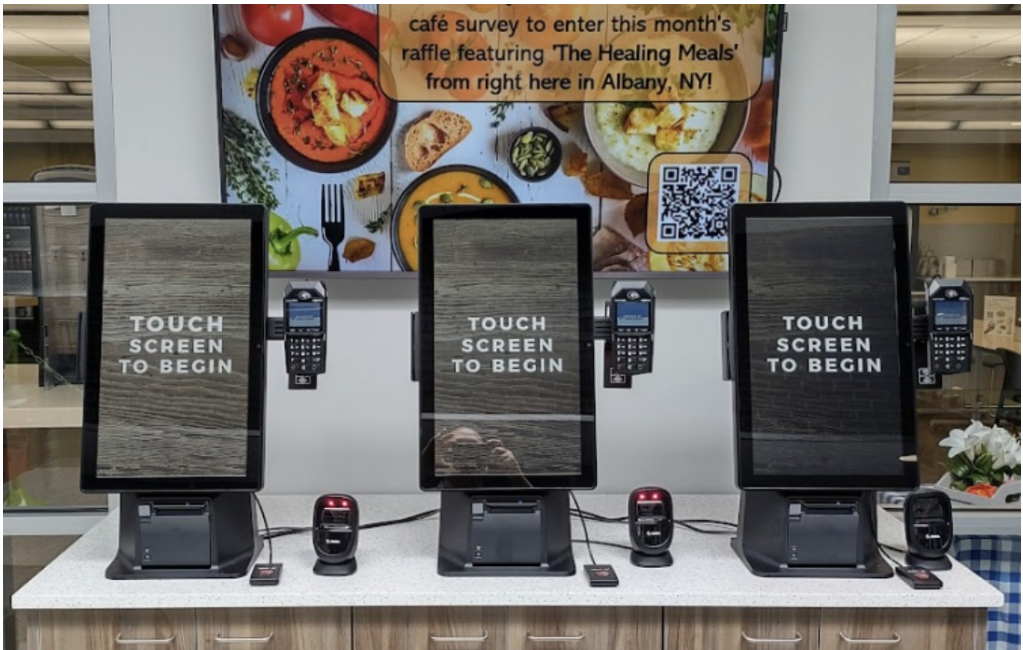

Genius Drive Thru

Heritage	SICOM Timer → Drive-Thru Director → Vision, the Genius next-generation drive-thru timer platform.
Capabilities	Lane events from detectors, cameras and order-confirmation units; real-time vehicle visualization; single/dual-lane workflows; reporting and APIs; zone configuration for queue, pickup and pull-forward activity.
McDonald's relevance	Supports speed-of-service visibility and a more complete operational view of the drive-thru journey.
Selected experience	CosMc's selected Genius drive-thru timer technology as part of its integrated platform. At Yoshinoya, 34 drive-thru locations paired menu boards with a timer and reported a 35% improvement in service time.

Self-service ordering

Genius Kiosk

Heritage	Xenial Kiosk hardware and software and Xenial Ordering Kiosk, now within the Genius portfolio.
Capabilities	Indoor/outdoor self-service ordering with multiple mounting options, favorites and repeat orders, multilingual and accessibility features, dynamic splash screens and pickup workflows.
McDonald's relevance	Provides modular self-service and integration options for restaurant environments, subject to McDonald's store and accessibility standards.
Selected experience	CosMc's selected Genius indoor and outdoor kiosks as part of its integrated platform. Genius brings more than 20 years of kiosk development and 15,000+ self-service installations worldwide.

Freestanding Genius self-service kiosks in a restaurant environment

Genius hardware

Genius Hardware

Heritage	Xenial and SICOM POS hardware, portable tablets and rugged terminals, unified under the Genius hardware identity.
Capabilities	Global Payments designs and owns the core Genius hardware specification, with Flytech as manufacturing partner. The portfolio supports modular countertop, handheld, kiosk and tethered configurations.
McDonald's relevance	Provides a consistent device experience across counter, line-busting and self-service workflows, subject to McDonald's hardware, certification and service requirements.
Selected experience	CosMc's selected Genius hardware across its cloud POS and indoor/outdoor self-service environment.

Countertop

Modular merchant and customer-facing displays.

Handheld

Portable POS with integrated payment.

Counter and kiosk

Multiple configurations within one hardware family.

Payments and back office

Genius Payments

Heritage	Global Payments Integrated and Portico capabilities, with Merchantware/Cayan heritage and Global Payments + Worldpay processing reach.
Capabilities	Integrated acceptance across counter, drive-thru, kiosk and digital commerce; EMV/contactless and wallets; card-present and online acceptance; P2PE/tokenization; terminal management and store-and-forward.
McDonald's relevance	Supports cross-channel orchestration, processor flexibility, centralized device control, offline resilience and token continuity.
Selected experience	CosMc's used Global Payments for payment processing; FreedomPay supplied the gateway for its unattended-payment requirement.

Genius Back Office

Heritage	The Portal RTI, RTI Financial Accounting, Back Office and enterprise reporting heritage.
Capabilities	Back-office and enterprise reporting capabilities spanning restaurant operations, inventory, labor, financial information and enterprise-level visibility.
McDonald's relevance	Connects restaurant activity with operational and enterprise reporting to support more consistent decision-making across the system.
Selected experience	Global Payments continues to support customers across The Portal RTI, RTI Financial Accounting and Back Office product families.
